

Book	Policy Manual
Section	3000 - Business and Noninstructional Operations
Title	Energy and Water Management
Code	BP3511
Status	Active
Adopted	August 19, 2008
Last Revised	August 19, 2008
Last Reviewed	August 19, 2008

The Governing Board recognizes the importance of minimizing the district's use of natural resources, providing a high-quality environment that promotes health and productivity, and effectively managing the district's fiscal resources. To the end, the Superintendent or designee shall develop a resource management program which includes strategies for implementing effective and sustainable resource practices, exploring renewable and clean energy technologies, reducing energy and water consumption, minimizing utility costs, reducing the amount of waste of consumable materials, encouraging recycling and green procurement practices, and promoting conservation principles.

(cf. 3100 - Budget)  
 (cf. 3300 - Expenditures and Purchases)  
 (cf. 3511.1 - Integrated Waste Management)  
 (cf. 3512 - Equipment)  
 (cf. 6142.5 - Environmental Education)

The Superintendent or designee shall regularly inspect district facilities and operations and make recommendations for maintenance and capital expenditures which may help the district reach its conservation and management goals.

(cf. 7110 - Facilities Master Plan)  
 (cf. 7111 - Evaluating Existing Buildings)

\*\*\*Note: The California Energy Commission administers the Bright Schools Program pursuant to Public Resources Code 25410-25421. This program offers specific services to help districts become more energy efficient by providing design and implementation assistance, conducting energy audit and feasibility studies, providing equipment bid specifications, assisting with installation, and helping to secure loans for energy-related maintenance. \*\*\*

The Superintendent or designee shall make every effort to identify funding opportunities and cost-reducing incentive programs to help the district achieve its conservation and management goals.

The Superintendent or designee shall periodically report to the Board on the district's progress in meeting its conservation and management goals.

#### Storm Water Management

\*\*\*Note: State and federal law authorize the State Water Resources Control Board (SWRCB) or a California regional water quality control board to designate a school district as an entity ("non- traditional MS4") which is required to obtain "coverage" under a "General Permit for Storm Water Discharges to Small Municipal Separate Storm Sewer Systems." A district may be so designated for any reason, including a water quality threat posed by its operation of storm drainage systems, at any district facility, which drain into a

municipal storm drainage system or directly into a stream, creek, river, or the ocean. A district required to obtain coverage under this General Permit is prohibited from discharging certain pollutants, other than storm water, into the storm drainage system and must develop a storm water management plan. The General Permit requires that the Board, as the governing body of the district, adopt a resolution containing the plan and authorizing the Superintendent to implement and enforce the plan. The plan must then be submitted to the local regional water quality control board for approval. In addition, the district is required to submit annual reports to the local regional water control board describing the district's progress in implementing the plan. \*\*\*

\*\*\*Note: The SWRCB anticipates that many school districts will be designated as "non- traditional MS4" over the next several years. Districts should consult with representatives of the local regional water control board and county office of education to ensure that appropriate plans are developed. Districts that have not yet been designated may revise or delete the following section as appropriate.\*\*\*

The Board desires to ensure that, to the maximum extent practicable, the district reduce the discharge of pollutants into the water system in order to minimize the threat to water quality from storm water runoff. When the district has been designated by the State Water Resources Control Board or a regional water quality control board, the Superintendent or designee shall ensure that the district complies with applicable General Permit requirements.

(cf. 3514 - Environmental Safety)  
(cf. 3514.1 - Hazardous Substances)  
(cf. 3514.2 - Integrated Pest Management)
