Administrative Regulation

Environmental Safety

AR 3514

Business and Noninstructional Operations

Asbestos Testing and Abatement

Maintenance staff shall be trained in the location, identification, proper cleaning and ongoing maintenance of asbestos-containing materials and in the removal and decontamination of small amounts of such materials when needed to repair pipes or perform similar duties. Any more extensive asbestos abatement work shall be done by state-certified asbestos abatement contractors in compliance with state and federal standards.

The district's complete, updated management plan for material containing asbestos in school buildings shall be available for inspection in district and school offices during normal business hours. Parent, teacher and employee organizations shall annually be informed of the availability of this plan. (40 CFR 763.93)

(cf. 5145.6 - Parental Notifications)

Other Environmental Safety Precautions

Principals or their designees shall enforce school rules and designed to:

1. Prevent the accumulation of flammable, noxious or otherwise dangerous materials unless adequate safeguards are provided.
2. Keep all school facilities free of debris.

3. Keep walkways at all times open to pedestrian traffic and clear of obstructions.
