

Regulation 7111: Evaluating Existing Buildings

Status: ADOPTED

Original Adopted Date: 11/13/2012 | **Last Reviewed Date:** 11/13/2012

The Superintendent or designee shall periodically evaluate the adequacy, design, and conditions of existing district facilities to determine whether they meet the needs of the instructional program and provide a healthful and pleasing environment for students and staff. He/she also shall determine whether district facilities fulfill legal requirements for safety and structural soundness, and energy conservation.

In addition, the Superintendent or designee shall regularly calculate the capacity of existing school buildings to adequately house the district's current students and projected enrollments.

Any identified needs for repair, modernization, or construction shall be incorporated into the district's facilities planning process.

Structural Safety

In the event that the Department of General Services or any licensed structural engineer or licensed architect finds and reports to the Governing Board that a district building is unsafe for use, the Superintendent or designee shall immediately obtain an estimate of the cost of repairs or reconstruction necessary to bring the building up to legal standards for structural safety. The Board shall establish a system of priorities for the repair, reconstruction, or replacement of unsafe school buildings. (Education Code 17367)

A relocatable school building or structure shall meet the requirements of Education Code 17280-17317 and 17365-17374 pertaining to structural safety. However, a relocatable building that does not meet the requirements of Education Code 17280 may be used as a school building until September 30, 2015, if all the conditions specified in Education Code 17292 are met and the Board so certifies to the Department of General Services. (Education Code 17291, 17292)
